

IDAL GROUP S.p.A.
The future is in your hands

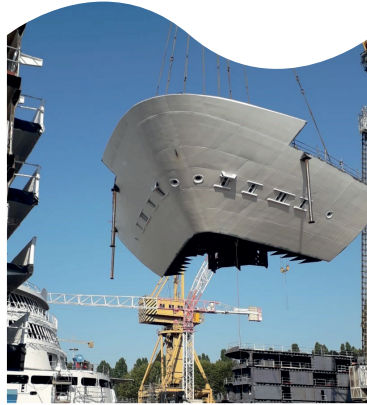

SHIPBUILDING STEELWORK

A consolidated experience in heavy carpentry allows us to rely on highly trained personnel for each type of processing.

The main activities are:

Pre-fabrication and pre-assembly activities

Installation of blocks and/or sections on a slipway or dock

Windows mounting

Mounting electrical carpentry, firefighting

Carpentry, welding and finishing work for the assembly of semi-finished products, blocks or composite elements (sections) of hull

Planking, bridge and structure alignment

For over thirty years of activity, the acquisition of important store clerks has seen us involved in the realization of the main products of the world-wide shipbuilding field in the section of the ships from transport, cruise and military, as well as off-shore platforms, consistently achieving the high standards of quality required by the customer.

STEELWORK AND PIPING

In our production workshops, we carry out light and heavy metal carpentry work, for the contract production of semi-finished products and components for various industrial sectors.

We process the main metal alloys such as carbon steel, aluminium and new materials such as Corten.

There is also a dedicated area for the processing of more noble materials such as stainless steel AISI 304 and AISI 316, brass and copper.

We offer a robust experience at the service of the main companies in the industrial, and naval sectors for:

**Turnkey supply of flooring,
stairs, doors, foundations,
balustrades**

**Turnkey supply for the
construction of pipe systems**

Offering a reliable, custom-oriented service, creating a valuable partnership between client and supplier.

The company has refined an organization and a flexible and dynamic structure, which allows you to optimally manage each phase of the entire production cycle, ensuring customers quick and profitable solutions.

The entire production cycle, both machines and workstations, are interconnected with the 4.0 system.

MARINE INTERIORS AND OUTFITTING SERVICE

Turnkey supply for the construction of public areas:

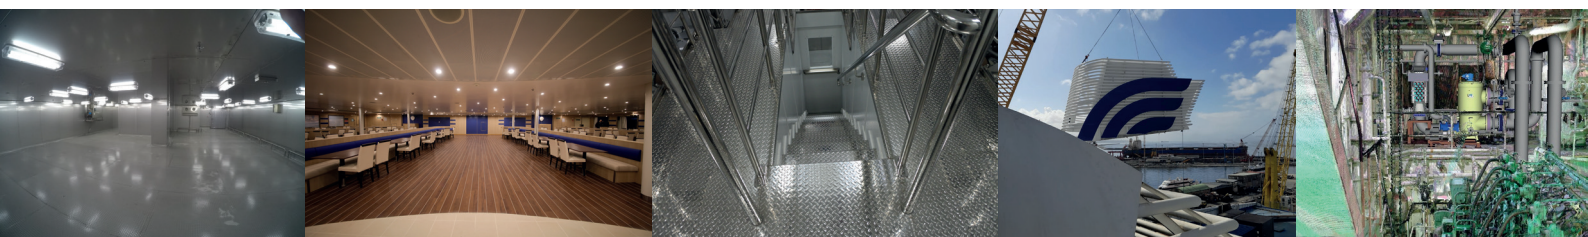

The catering areas represent, without any doubt, some of the most important areas for the development of life on board for both passengers and crew. For this reason, the setting up of these areas is entrusted to highly specialized and experienced personnel from the first design phase to the realization and final testing.

MAINTENANCE, REPAIRS AND REFITTING

We perform ordinary and extraordinary maintenance work in the industrial and naval sector (in the basin, in the dock and in navigation). Our Society is authorized for the execution of the intense activities ex art. 68 C.d.N. near the main Italian ports.

In detail we perform:

Maintenance of thermal installations

Maintenance of public areas (cabins, catering areas and cold rooms)

Maintenance of refrigeration and air-conditioning systems

Construction and maintenance of steel and composite stairs, walkways floorboards, composite pipes GRP, GRE, GRVE

Hull repairing

BWTS-BWMS systems

Steelwork

3D Scanning

Piping systems

To support our business we have set up a mobile workshop of 40 feet fully equipped and always operational to meet every need of national and international customers.
